PORTUGUESE — NATIVE
ENGLISH — ADVANCED

EDUCATION

Higher Education, Estácio
Program: Internet Systems Technology
Status: In progress

High School, Cândido Portinari State School

PROFESSIONAL PROFILE

Full-stack developer with experience in web applications, APIs, integrations, automated tests, and deployments. I work with Angular, TypeScript, Node.js, C#/.NET, and PostgreSQL. Through Atronos Forge, I expanded my infrastructure and operations practice with local Docker/Supabase environments, CI/CD with GitHub Actions, an API on a Linux server behind Cloudflare Tunnel, and care with authentication, authorization, and secrets.

PROFESSIONAL EXPERIENCE

Full-stack Developer

SHV Digital

Jul. 2025 – Aug. 2026

Worked on the development and maintenance of web applications using Angular, C#/.NET, TypeScript, PostgreSQL, Docker, Git/GitHub, and Azure. Built APIs, automated tests, integrations, features, bug fixes, deployments, and log analysis.

Packaging Operator

Arcelormittal

Sep. 2024 – Jun. 2025

Responsible for quality and safety at the final production stage, including material preparation and selection, packaging, documentation, quality inspection, and safe product handling.

Freelance Web Developer

MeuBichin Ltda

Dec. 2023 – Mar. 2024

Built the MeuBichin website with React, Next.js, and TypeScript. I handled the work from tool selection to implementation, using Tailwind CSS, Chakra UI, and Next.js routes for detailed pages.

CORE COMPETENCIES

Full-stack product development
Application architecture
Infrastructure and CI/CD
APIs and integrations
Automated testing
Application security
Responsive, mobile-first UX

PROFESSIONAL EXPERIENCE

Financial Manager

Casa Das Massas

Dec. 2023 – Mar. 2024

Managed spreadsheets that tracked monthly fixed costs, sales, and material prices. Consolidated iFood reports and in-person sales into an automated spreadsheet for profit, revenue, and expense analysis.

Administrative Assistant

MeuBichin Ltda

Aug. 2017 – Jul. 2022

Worked on administrative and customer-service routines, inventory control, product verification, financial and inventory spreadsheet updates, and support for creative projects and sales.

FEATURED PROJECT

Atronos Forge

An actively developed full-stack platform for D&D, composed of a public Hub, a mobile-first/offline-first Player, a Dungeon Master application, and a shared API. Built with **Angular, TypeScript, Node.js, Fastify, and Supabase/PostgreSQL**, with interfaces in **pt-BR, en, and es**.

The work includes cross-repository architecture, a PWA and IndexedDB in Player, server-side authentication and authorization, cloud sync and backup, automated tests, and CI/CD. **atronos-forge.com**
